

## Soluble Superflex

A complementary feedingstuff.

### Legal Category:

A complementary feedingstuff for horses.

### Package:

1lt, 2lt and 5lt. 1lt will last up to 66 days.

Soluble Superflex is recommended for the maintenance of joint integrity.

Unsoundness is by far the most common cause of incapacitation in the horse, due to the pressures from both confirmation and competition training. Increasingly both traditional and nutritional support are being used effectively. Sulphur is the essential building block of life, as essential to the body as water. Cell regeneration requires regular supplies of sulphur to support the natural healing process. Unfortunately, due to modern packaging and processing of feeds, as well as limited species variation in pasture, sulphur is often lacking in the equine diet. Feeding elemental sulphur is of no benefit to the horse as it can not be absorbed. Organic sulphur is natural to the horse's diet and readily assimilated. Chondroitin sulphate plays an integral role both in healthy cartilage and synovial fluid. Where wear and tear occurs, free radicals can proliferate and exaggerate the problem. Many strains and traumas from the daily training of performance horses, develop into a problem as a result of this. Soluble Superflex contains organic sulphur (MSM) and Chondroitin Sulphate in a readily absorbed liquid form. It also contains naturally sourced anti-oxidants. Soluble Superflex is recommended either where the horses' history suggests a need, or as an insurance measure. As liquids are readily absorbed it may be of benefit to the older horse where poor digestion is often associated with wear and tear.

### Instructions:

For a 500kg horse: loading rate: up to 60 ml for 3-10 days Maintenance: 30ml per day Low maintenance: 15 ml per day.

### Storage:

Store in a dry place and replace lid after use.

### Contents:

Protein 4.1 % Ash 0.28% Fibre 0% Oil 0.4% Moisture 89.9%.

### Ingredients:

MSM. Glucosamine HCl, chondroitin sulphate, Vitamin C Per 30 ml dose: 3600 mg MSM 3000 mg Glucosamine HCl 900mg Chondroitin sulphate.

### Key Ingredients:

n/a

### Further Information:

The maintenance quantity is dependent on the individual and is determined by observation of the horses comfort and flexibility. NAF uses chondroitin sulphate from ecologically sustainable sources only.
